## HEADLINE: Washington Inventors Develop Ground Taxi Instruction Displaying System

**BYLINE: US Fed News**

**DATELINE: Alexandria, Va.**

**BODY:**

**ALEXANDRIA, Va., May 23 --** Samuel T. Clark of Federal Way, Wash., Wayne R. Jones of Bellevue, Wash., Michael P. Snow of Langley, Wash., and Eddie J. Trujillo of Snohomish, Wash., have developed a system and a method for the efficient entry and display of ground taxi routes on an electronic airport map display.

According to the U.S. Patent & Trademark Office: "The system may include a touchscreen entry device, a display device, a computer, a map database, a vehicle position sensor and a transmitter/receiver. The system may be configured to check the ground taxi entries to ensure that each successive segment is contiguous with the last or next segment, and any gaps or discontinuities in the displayed taxi instructions may be annunciated. An intelligent display of next possible segments may be incorporated into the system."

The inventors were issued U.S. Patent No. 7,222,017 on May 22.

The patent has been assigned to Boeing Co., Chicago.

The original application was filed on June 17, 2004, and is available at: <http://patft.uspto.gov/netacgi/nph-Parser?Sect1=PTO1&Sect2=HITOFF&d=PALL&p=1&u=%2Fnethtml%2FPTO%2Fsrchnum.htm&r=1&f=G&l=50&s1=7,222,017.PN.&OS=PN/7,222,017&RS=PN/7,222,017>.
